MEMORANDUM

SUBJECT: Martha C. Rose Site Proposed Plan  
Holden, Missouri

FROM: Leo J. Alderman *Leo J. Alderman*  
Chief, Toxics and Pesticides Branch

TO: Robert L. Morby  
Chief, Superfund Branch

The Martha C. Rose Proposed Plan was reviewed in response to your May 24, 1991, memorandum. Alternatives 1 through 5 do not meet all the criteria of the TSCA PCB Spill Policy. The capping of the soils on site is not addressed in the PCB Spill Policy and the soil clean-up criteria is 10 mg/kg provided the soil is excavated to a minimum of 10 inches. The excavated soil will be replaced with clean soil (less than 1 mg/kg).

Alternative 6 meets the criteria of the TSCA PCB Spill Policy. The Toxics and Pesticides Branch would like to review any process which decontaminates metal or uses solvents to remove PCBs from contaminated soil and concrete prior to its implementation. The clean-up of stream bed sediments to 0.18 mg/kg PCBs is acceptable with approval from the Agency for Toxic Substances and Disease Registry. Finally, activated carbon used to remove PCBs from water and other wastes generated during PCB removal activities should be disposed according to 40 C.F.R. Part 761.

If you have any questions concerning these comments, please contact Paul Nunes of my staff at Extension 7384.
